

## Directions For Mounting Image

1. Remove all caps and flip the acrylic piece over on its front surface.  
\*(Be sure to set acrylic on soft fabric to protect from scratching.)
2. Mount your image to the back piece of acrylic with double sided tape.
3. Replace the top piece of acrylic onto the back piece with the mounted media.
4. Line up holes in both pieces of acrylic.
5. Securely fasten all caps.

## Directions For Hanging Vetro Frame

\*(See Diagram 2) If using optional **security bracket (B)** you will need to pre-measure the distance between bottom of **wall mounting bracket (A)** to top of **security bracket (B)**. Save the **(A)** to **(B)** measurement for later when mounting optional security bracket.

1. Peel back the tape to remove the **wall mounting bracket (A)** from the rear cleat.
2. Place **wall mounting bracket (A)** in desired location, level it and mark the location of the holes.
3. Using a 1/4" drill bit, drill holes at the marked locations. Tap provided wall anchors into drilled holes.
4. Place **wall mounting bracket (A)** over anchors and fasten using provided screws.  
\*(Be sure to use a level before the final tightening)
5. Hang the vetro frame onto the **wall mounting bracket (A)** using the frames **rear cleat**.

## Directions For Mounting Optional Security Bracket

1. After installing **wall mounting bracket (A)**, use your **(A)** to **(B)** measurement to mark the location where the top of the **security bracket (B)** should be mounted to the wall.
2. Place **security bracket (B)** under the marked location, level it and mark the location of the screw holes that are in the bracket.
3. Using a 1/4" drill bit, drill holes at the marked locations. Tap provided wall anchors into drilled holes.
4. Place **security bracket (B)** over anchors and fasten using provided screws.  
\*(Be sure to use a level before the final tightening)
5. Slide the vetro frame carefully down onto the **wall mounting bracket (A)**. Drive the **security screw** up through the **security bracket (B)** and into the **bottom frame support**.

\*NEVER USE GLASS CLEANER TO CLEAN ACRYLIC SURFACES. ONLY USE AN ACRYLIC CLEANER OR POLISH LIKE BRILLIANIZE.
